Fleece Scarf Instructions

Please note: Kid-sized scarves are 6"-7" wide x 55"-60" long & Adult-sized scarves are 8"-9" wide x 60"-70" long.. Make sure that your pattern is not too large and runs in the right direction. Fleece runs 58"-60" wide; there is also extra wide fleece that is 85" wide.

1. Squaring up the Fabric

- a. Fold the fabric in two to cut it square more easily.
- b. Place the folded edge on a straight line on the cutting mat. You will then trim the perpendicular edge. This will ensure that the sides of the scarf will end up square.

- c. Using a rotary cutter and a long ruler trim off the unevenly cut edge from one end of the fabric.

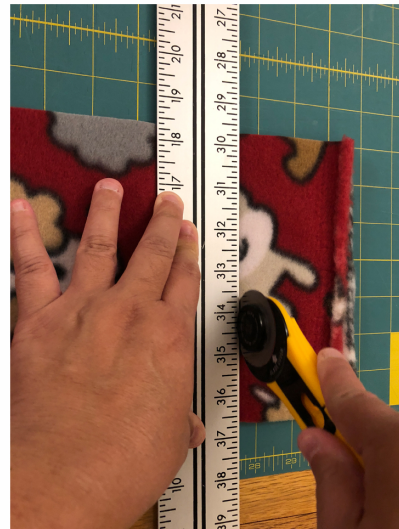

2. Making the scarf

- a. Cut off strips in the desired width of your scarf (7" is shown here).

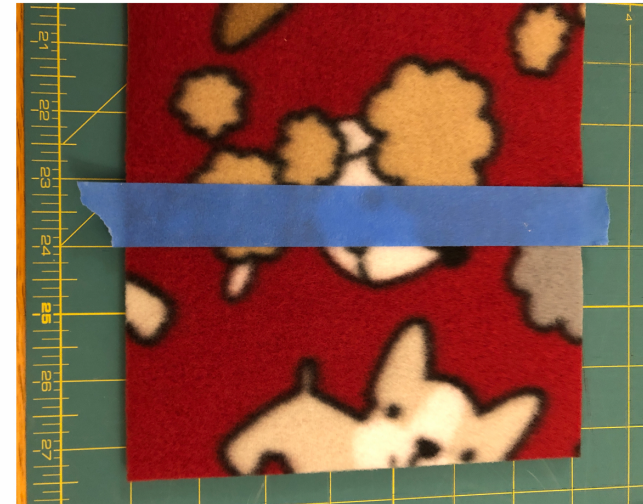

- b. Cut off the selvedge edge to the desired length of the scarf (55" shown here).

Fleece Scarf Instructions (continued)

- c. Mark the ends about 3"-4" up from each of the ends with painters tape

- d. Leaving the ends together cut strips on the short edges of the scarf that are 1/2 inch apart all the way up to the edge of the tape

- f. Remove tape and enjoy!

- 3. Option 1: Scarf with Knots. If you would like to add knots, mark the fabric 4 1/2" from the top before cutting your strips. Cut strips that are 1/2 inch apart all the way up to the edge of the tape. Repeat on the other end. Take a strip and tie a single over hand knot close to the end of the cut near the tape. Tie each tassel into a knot. Remember to tie the knots in the same way to make it look uniform. Repeat on the other side and remove tape when finished.

- 4. Options 2: Scarf with Beads. Follow instructions as in Option 1, but slide a bead on each tassel before tying a knot to secure.
