## Tied Fleece Scarf Instructions

Please note: Kid-sized scarves are 55"-60" long & Adult-sized scarves are 60"-70" long.. Make sure that your pattern is not too large and runs in the right direction. Fleece runs 58"-60" wide; there is also extra wide fleece that is 85" wide.

1. Cut two 6" strips in the length you desire
2. Measure 2.5" from the long edge and draw a line down the entire length of 1 of the pieces.

3. Place the two fabric pieces together and cut 1" strips up to the 2.5" mark.

4. Place the two fabric pieces side by side with the cut strips facing each other and begin tying knots with them. Take care to tie them the same way each time.

5. Continue till end. Enjoy!
